A collaboration between your company and Transfertech Thailand (which includes its sister company Transtech Vietnam and parent company Transfertex Germany) will help you with two major requirements:  
**New, cutting-edge trendy print designs and state of the art sublimation printing technology.**  
 As a partner we are your one-stop service for innovation, creativity and quality. Either for the **Sport, Fashion or Home** sector, we are your solution!

# HISTORY - ABOUT US

- ▶ Specialized in Digital Printing and Heat Transfer Printing, Transfertech has always been one of the leading companies in the printing industry worldwide. Transfertech also provides you with the World's best in Rotogravure Printing for Transfer Printing. All of our transfer printing papers are produced at our parent company in Germany, Transtex. With high precision rotogravure technology, state of the art Digital Printing and Sublimation machines, Transfertech guarantees supreme/first-class quality.
- ▶ Transfertech Thailand and Transtex Vietnam have joined forces with Transfertex Germany, fortifying themselves as a creative and competitive Regional Hub in marketing, design and development/production in Asia. Together we provide a brilliant service, based on our 40 years plus experience in Rotogravure Sublimation Technology of Transfertex and the Know-How and technical experience in the Sports, Fashion and Home Industry by Transfertech/Transtex (TFT/TT).
- ▶ With our in-house Hi-Tech Digital Printing Machines every design can be instantly printed on Transfer Paper and immediately transferred onto fabric.
- ▶ Joining Transfertech Thailand in the show is Transtex Vietnam. This sister company has been created to feed the demand for high quality and standards of Sublimation Printed fabrics in Vietnam (HCMC). Partnership with Transfertex not only provides your company with the highest quality paper for transfer printing, but also offers you a selection of updated mood-boards and themes/stories based on the latest trends forecasts worldwide. It also offers access to an online library of AOP designs developed for each season and with monthly updates.
- ▶ The 40 years experience in Rotogravure sublimation technology of Transfertex and the 15 years of printing experience and Know-How in the Sports, Home and Fashion Industry of Transfertech and Transtex make it obvious why you would chose us as your printer of choice.

# WHAT WE OFFER

**SPORT COLLECTION** From working closely with the world's leading brands in active sportswear, our standards in design execution, graphics, colour consistency and layout produce "First Time Right" developments and on time productions. This reliability and the speed in delivery for repeat orders has elevated Transfertech to become the market lead in printed sportswear fabrics.

**ACTIVEWEAR COLLECTION** As activewear becomes a more fashionable product and more popular with consumers, sales have and will significantly increase. Today activewear is not only a garment used for exercise or sports but also a fashion statement.

As does sportswear, activewear design must consider the thermal insulation needs of the wearer. In hot situations, sportswear should allow the wearer to stay cool, while in cold situations sportswear should help the wearer to stay warm. We use only the best fabrics available that we source from all over the world.

**FASHION COLLECTION** Transfertech & Transtec have the capacity to provide the largest exclusive fashion collections to satisfy the local and global fashion industry. The themes available are vast and updated on a weekly basis by our team of Fashion and Graphic experts.

Fast selection from new trends and designs on an online platform create a competitive advantage for our customers and their brands. You can print any graphic work/design instantly using digital print.

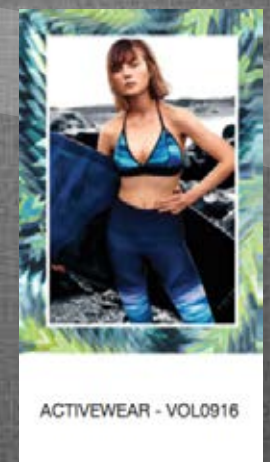

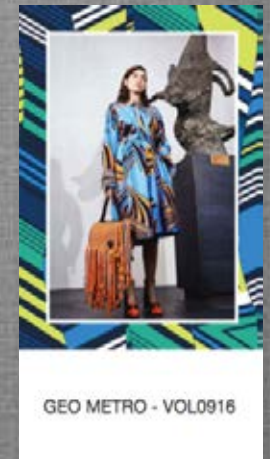

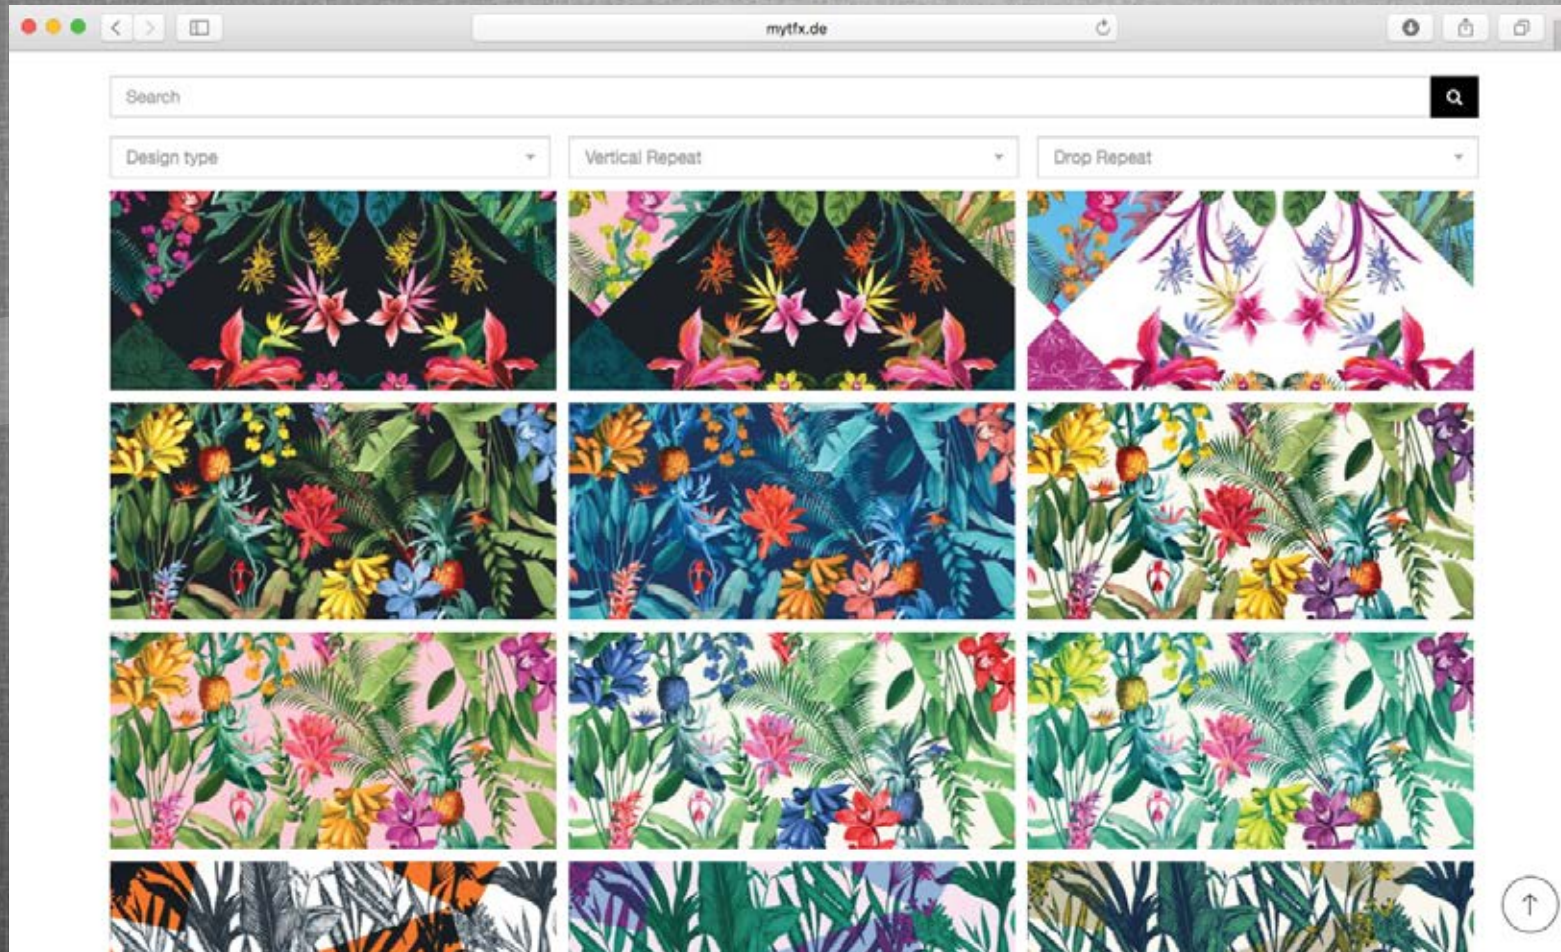

Due to our technical alignment we are able to print and match with exact colours anywhere in the world.

**HOME COLLECTION** TransferTech & TransTec offer you the latest trend designs and the best colour harmony with our home and interiors textile collections. Our high standard in manufacturing guarantees an excellent preservation and durability of the colour, even after many washes and years of use. As in the Fashion Collection, you will have a boundless variety of updated and trendy AOP designs. Fast Fashion is one of our main strengths and used by world leading high fashion and fast fashion brands.

# PRINT COLLECTION: *SPEED TO MARKET* - FASHION - SPORTS - HOME - ACTIVE

Customers can choose from over 7,500 AOP designs, select from various colour ways and themes as well as adjust colours to their collection needs and trends. This service is provided by an Online Library and will deliver designs with speed to market like never before. Our team of creatives offer you new fashion trend designs on a daily basis.

- Fast Fashion is one of our main strengths and used by world leading high fashion and fast fashion brands -

# MATERIAL EFFICIENCY

# CUSTOM DESIGN

Material is a substantial part of the final cost. If you're able to be efficient you save expenses, but more importantly you save time. Our in-house team of Graphic Designers and QC's help to optimize your pattern layout to use minimum material consumption and also guarantee colour and fabric standards.

*- PRODUCTION CAPACITY -*  
FROM 1 TO 1 MILLION  
METER PER MONTH

## ENGINEERED PATTERNS & DESIGNS

In-house we Digitally Print imported high quality paper and carry out Sublimation Printing of the fabric for many of the segments of the industry: Sport, Fashion, Home, Accessories, Promotional, and more. After receiving your requirement we develop it according to order quantity either into a Digital or Rotogravure development. Rotogravure is developed in our partner company with state of the art machinery.

# ACCESSORY PRINTING

Sublimation Print on Elastics, Lace, Ribbons, Buttons, Labels are just some more of products we can develop and produce. There is no minimum quantity. - Flexibility of quantity, guaranteed quality and competitive cost all add value to your product line.

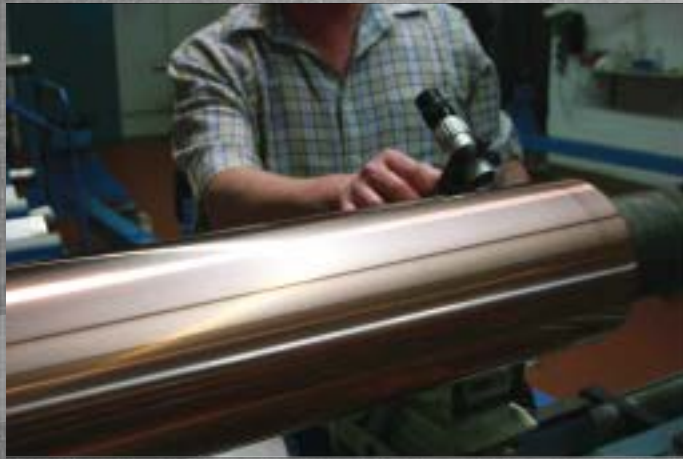

# LASER CUTTING

Laser cutting of printed polyester fabrics can be done either in all over printed patterns or in positional designs. The precision of these machines will allow you to explore different limits in your creativity. Labels, patches, badges and garment patterns are all added values you can offer to your collections.

# PRINTING TECHNOLOGY

Our in-house designers work to separate colours, layer files and grade sizes for your designs. Initial samples are produced by our in-house digital printing and transfer paper. After approval smaller collections or individual/custom designs are prepared for in-house Digital Printing Production. Larger production quantities are prepared for Rotogravure printing for a more competitive advantage.

We're constantly expanding our capacities and our capabilities to better serve our customers with the highest standards in every step of the process. TransferTech / TransTec / Tranfertex have the highest quality products in the industry and there's no other sublimation printing service that has made such commitment to technology and evolution.

# DIGITAL PRINTING

Digital printing is replacing traditional methods in different branches of the graphics industry. Faster, cleaner, efficiency... there are multiple reasons for this shift but the main drivers are: cost-efficiency, possibility to personalize prints, the flexibility of these machines and speed to market.

This is no different in the textile printing business. Traditional screen-printing is replaced by digital textile printing solutions like sublimation printing. Thus bigger advantage for shorter production runs and prints that require multiple colours and photographic imagery. The digital alternatives are ideal for the personalized prints, which is extremely popular nowadays.

# SUBLIMATION PRINTING

Sublimation printing is different from other printing processes in that it is essentially a two step process:

- First, a special paper is printed with sublimation dyes;
- Second, heat and pressure are applied to the paper together with the fabric. The image/design on the paper is dyed into the fabric.

Before being transferred, the printed image on paper looks very different from the actual final printed product. Visually, the dyes explode as color when transferred onto the fabric. They actually become part of the fabric unlike other printing methods that are only at the surface of the fabric.

# LAB

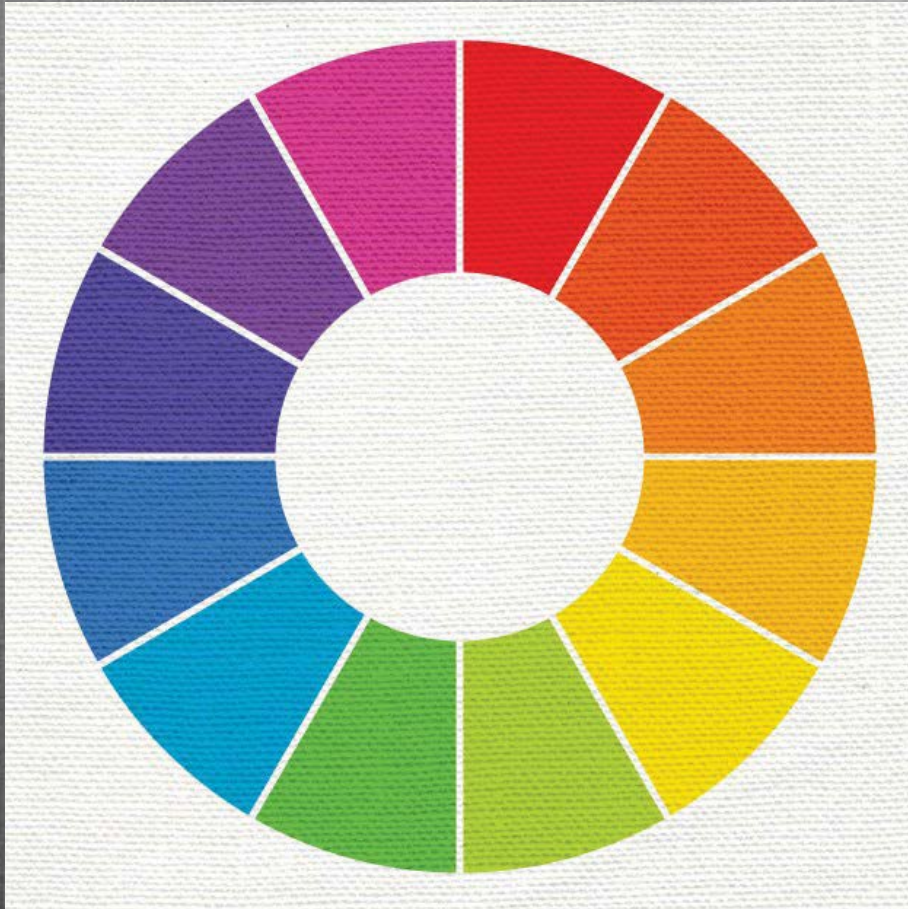

*Every job is submitted to rigorous Lab tests where we check for:*

- Fabric weight: (ISO 3801-1999) g/m<sup>2</sup>
- Dimension Stability to Washing (AATCC135-2004)
- Skewness: AATCC179
- Pilling/Hairy Effect on print (ASTM D3512)
- Absorbency (AATCC 79-2000)
- Wicking Test (Nike Method)
- pH Value (ATTCC 81-2006)
- Colour Fastness to Washing (AATTCC135/ISO 105)
- Colour Fastness to Water (ISO 105 04)
- Colour Fastness to to Perspiration (ISO 105 E04)
- Colour Fastness to Crocking (AATCC 8)
- Colour Fastness to Dye Migration

# VISION

“ TO BE THE BEST  
IN QUALITY AND  
PERFORMANCE ”

THE INDUSTRY IS CLEAR. THERE IS GOOD QUALITY AND POOR QUALITY.  
ON TIME DELIVERY AND DELAYED DELIVERY. TRANSPARENCY AND  
AMBIGUITY. WE BELIEVE AND WORK FOR QUALITY AND PERFORMANCE.  
- WE BELIEVE AND LIVE FOR A "RIGHT FIRST TIME" SERVICE AND SPEED  
DELIVERY CULTURE AND THAT IS WHAT WE GUARANTEE.

# SUSTAINABILITY

WE CARE ABOUT PLANET EARTH. WE RESPECT PLANETARY BOUNDARIES AND TAKE RESPONSIBILITY FOR HOW OUR COMPANY AFFECTS THE WORLD AROUND US.

THAT IS WHY WE WORK TO MAKE OUR BUSINESS SUSTAINABLE IN EVERY PHASE

- WASTE MANAGEMENT
- ENERGY REDUCTION
- RECYCLING
- NO USE OF WATER
- 0% EMISSIONS
- DUST FREE
- ENVIRONMENTALLY FRIENDLY

# UNIQUENESS

- ▶ "RIGHT FIRST TIME" SERVICE AND SPEED DELIVERY CULTURE
- ▶ COLOR CONSISTENCY AND QUALITY FROM APPROVED SAMPLE TO MULTIPLE REPEAT ORDERS
- ▶ 200,000 YARDS OF DIGITAL PRINTED FABRIC PER MONTH CAPACITY
- ▶ 1.1 MILLION YARDS OF TRANSFERED FABRIC PER MONTH CAPACITY
- ▶ GARMENT MANUFACTURING FACILITY OVER 100,000 PCS PER MONTH
- ▶ GLOBAL DESIGN ALIGNMENT TO SERVE YOU BETTER AND FASTER WITH NEW COLLECTIONS AND TRENDS ON-LINE
- ▶ STATE OF THE ART TECHNOLOGY FROM DESIGN CREATION TO DELIVERY OF FINAL PRODUCTS
- ▶ SPEED TO MARKET > EFFICIENCY AND CONTROL IN EVERY PART OF THE PROCESS
